

ISO 9001:2015 QUALITY POLICY

The management of the company is strongly committed to achieving customer satisfaction by implementing a quality management system within the organization. This is to ensure that every product manufactured in our factory meets customer requirements and is delivered on time as specified.

To ensure the successful implementation of the quality management system, I, as the Chief Executive Officer, hereby pledge my full support in all aspects related to the development and maintenance of the system. In line with this commitment, the company's quality management policy is hereby established.

"Quality Products, Service with a Personal Touch, and Sustainable Business."

Which are defined as follows:

| | |
|-------------------------------|---|
| Quality Products | means controlling the production of goods to ensure they meet the specifications set by the company, as well as maintaining and improving production efficiency. |
| Service with a Personal Touch | means focusing on ensuring customer satisfaction with the various services provided by the company. |
| Sustainable Business | means focusing on operations that are in compliance with ISO 9001:2015, with an emphasis on continuous improvement by ensuring consistent and better performance. |

The success of implementing the quality management system is not solely dependent on the management, but also requires the cooperation of all personnel within the company. Therefore, every employee must perform their duties responsibly by adhering to the procedures outlined in the quality management documentation accurately, completely, and consistently. However, the company encourages all employees to participate in providing feedback on improving work procedures, while ensuring the effectiveness of the system and considering workplace safety.
